

GRASS COLORANT

GreenUp Grass Colorant is environmentally friendly, organic pigment designed to be applied on brown, dormant natural turf-grass to instantly create a healthy lush natural green color. Individual coverage area will depend on the dilution ratio, intensity of the green color required, the height of the grass to be painted and the speed and type of the application equipment used. It will not wash or flake off the grass but come off as grass becomes healthy, grows and is mowed off along with the grass blades.

- Enhance the natural turf, natural grass color, appearance and quality.
- Will not fade or turn blue after application.
- GrassPigment works successfully and is safe on all types of natural grass and natural turf.
- Works differently than green turf dye grass paint.
- Far less expensive than over-seeding.
- For use on golf courses, home yards, commercial lawns.

READY TO USE GRASS COLORANT

GUGC-1F
1 GALLON SPRAYER
PRE LOADED WITH GRASS COLORANT
300 SF
