

# Klear Way

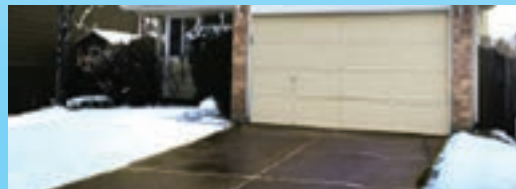

## Fully Automated Remote Control Driveway Deicing System

The new Bare Ground KlearWay deicing system is the “smart” way of keeping your driveway clear of ice and snow. KlearWay is designed to be either controlled remotely via our Smart Switch or manually operated via a single touch button once plugged into any AC outlet with a GFI circuit. The KlearWay system is easy to layout on your driveway or along side your driveway. It is truly simple to setup and operate. All parts are pre-assembled and merely require quick connect attachment to the AC pump, driveway oscillator and liquid deicer container (sold separately). The oscillating driveway liquid applicator is fully adjustable and can easily cover 1000sf.

- Pre treat your driveway and walkways to reduce snow accumulation
- Reduce Slip and Fall Accidents
- Fully automated deicing through pre-set timed spray intervals
- Powerful AC pump
- Crush resistant, kink proof stainless steel outdoor sprayer hose
- Fully Adjustable Oscillating Driveway Applicator so you can select your coverage area
- Smart Switch allows for remote programmed operation
- Applies liquid deicer quickly and thoroughly
- Works Effectively in All Weather Conditions
- Smartphone compatible as well as with Google Home and Amazon Alexa
- Capable of deicing up to 2” per hour

Deicer will not allow Snow & Ice to build up

Prevents accumulation even when snowfall rate is as much as 2 inches per hour!
